

Non-Negligent Manslaughter?

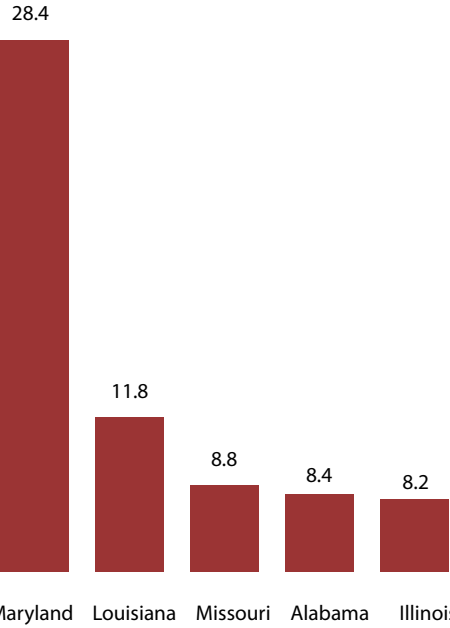

WILLFUL KILLING

Non-negligent manslaughter is the willful killing of one human being by another. In the 1991, non-negligent manslaughter peaked at 9.8 murders per 100,000. Since then, in 2016, the estimated murder rate dropped to 5.3 per 100,000, a decline of 46 percent. Through the years there has been some fluctuation, but nothing compares to its rate in 1991. Today, the murder rate of the 30 largest cities has fallen faster than the national rate. Despite of its drop in murder rate, it is still a crime that remains prevelant today.
